THE SCIENCE OF ADDICTION

Scientific research has established that addiction is a medical disorder that affects the brain and changes behavior. We have discovered many of the biological and environmental risk factors that increase the likelihood of addiction, and we know that there are genetic predispositions as well. At this forum, you will hear from experts in addiction science about how and why some people are afflicted with substance addictions while others are not. Bring your questions – there will be time for Q & A after the presentation.

A FREE NARCAN TRAINING WITH COMPLIMENTARY NARCAN KIT FOR IN-PERSON ATTENDEES WILL PRECEDE THE FORUM AT 5:30. TO REGISTER FOR THE NARCAN TRAINING, GO TO:
